

Many current browsers disable or block Adobe Flash by default. Flash is required to view the *Minnesota's Changing Climate Classroom*.

This document will explain how to enable Flash in various browsers.

[Google Chrome](#)

[Firefox](#)

[Microsoft Edge](#)

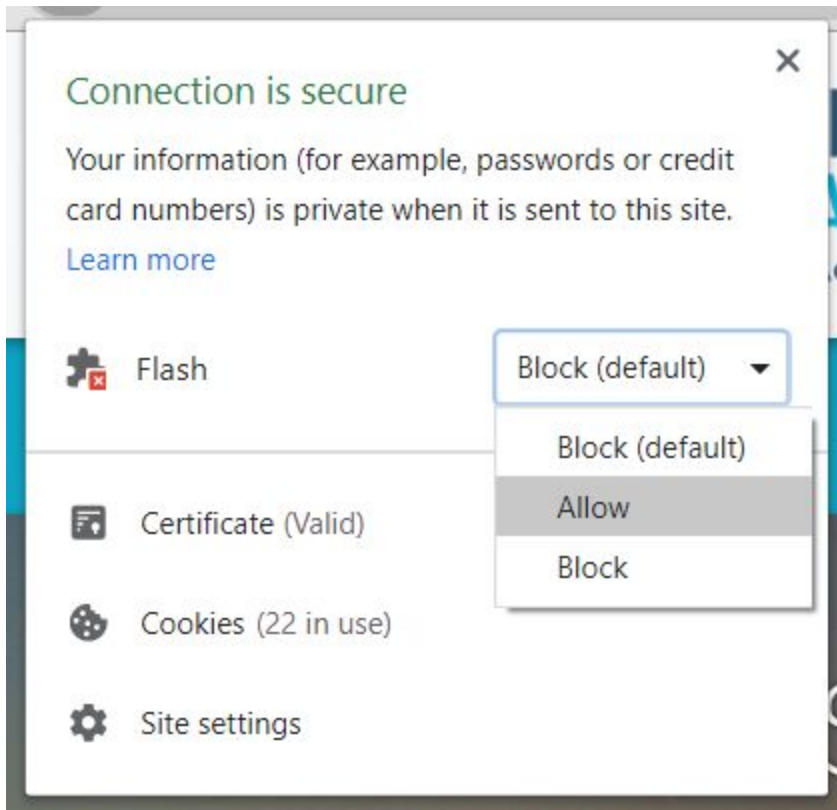

[Safari](#)

# Google Chrome

In the top left of the address bar, click the Lock icon next to the URL.

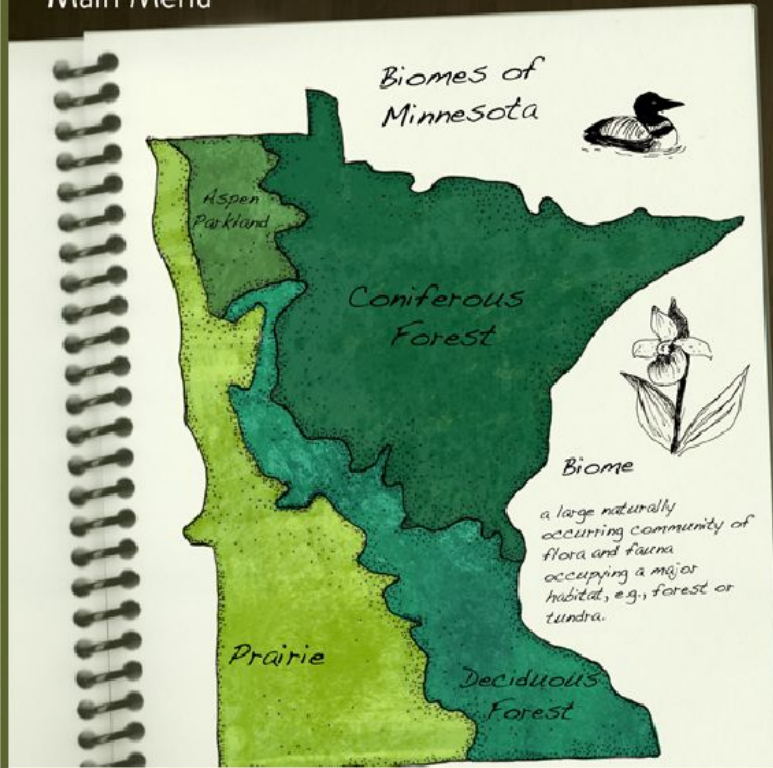

Change the Flash setting to Allow.

The *Minnesota's Changing Climate* Classroom should then appear:

# Minnesota's Changing Climate

Main Menu

Watch this first!

## Firefox

Flash is not included by default in Firefox (as of version 76.0.1). Instructions to install the Adobe Flash plugin may be found here: <https://get.adobe.com/flashplayer/>

## Microsoft Edge

Edge will initially load the *Minnesota's Changing Climate* Classroom with Flash disabled.

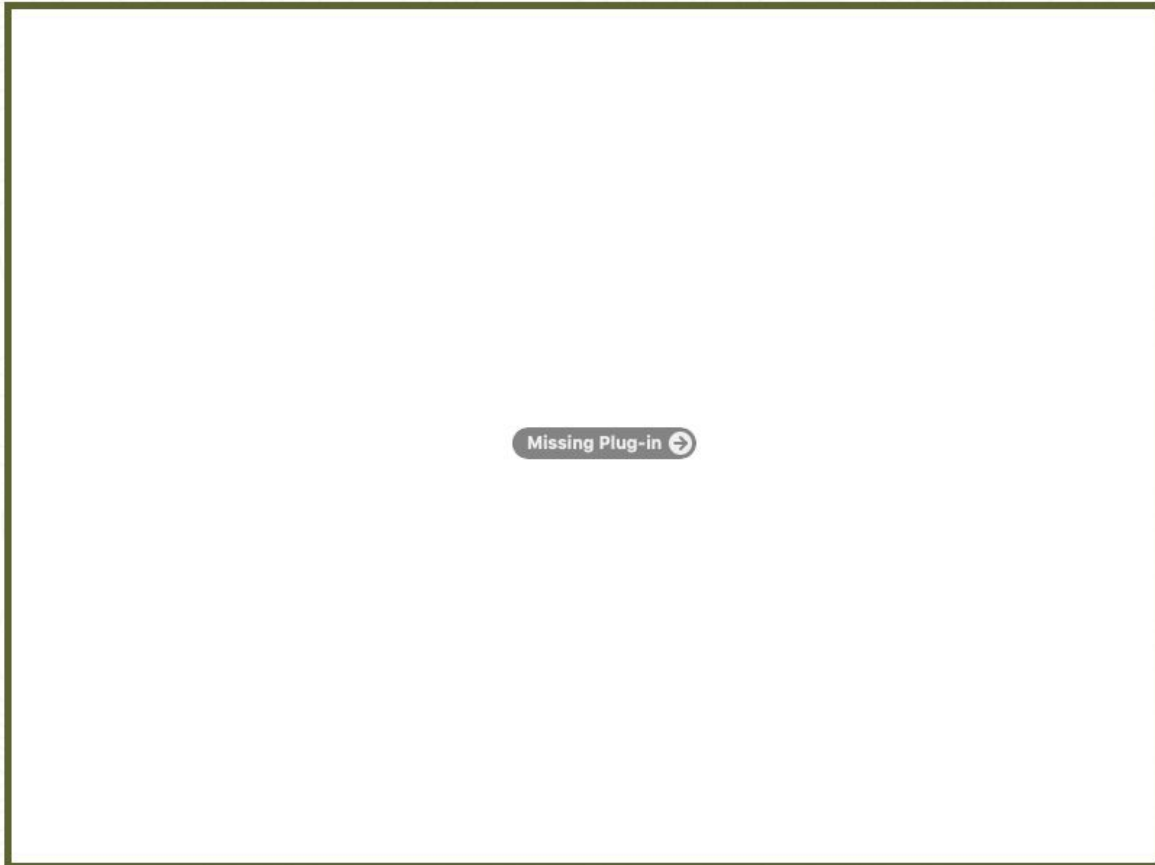

Click the puzzle piece icon. A small box will appear asking you to allow Flash.

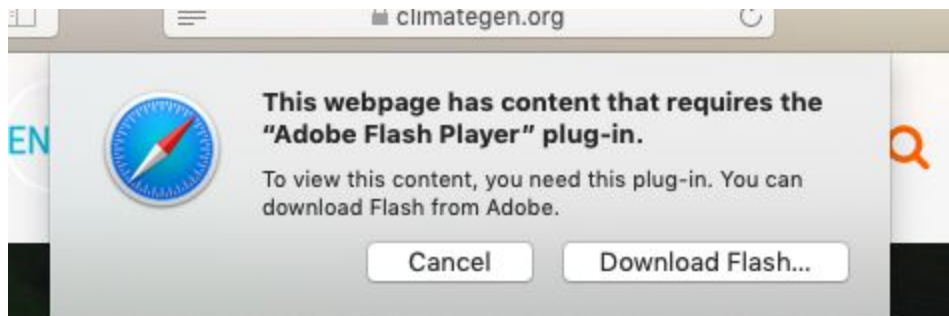

Click "Allow once". The page will refresh, and the Classroom will load.

# Safari

Safari will initially load the *Minnesota's Changing Climate Classroom* with Flash disabled.

Click the “missing plug in” icon. A small box will appear asking you to download Flash. Click “Download”. A new browser tab will open. Click Download Flash.

Open your “Downloads” folder on your computer and double click on the Flash installer to open and begin the download process.
